

Virus Detection Kit Powered by Bitdefender®

Advanced Threat Protection for Sharp
Multifunction Printers

Why add the Virus Detection Kit?

The BP-VD10L Virus Detection Kit complements the native security features of the BP Series by adding an extra layer of protection to help identify and eliminate current and emerging threats. Once installed on a Sharp BP Series multifunction printer (MFP)*, the Bitdefender engine scans every file going into and out of the device, stopping known and unknown threats before they reach your network.

How It Works

FUNCTION	IN PRACTICE
REAL-TIME AND ON-DEMAND SCANS	Jobs from the cloud, USB drives, email, firmware updates and app installs are scanned instantly; admins can also perform full scan on-demand from the control panel.
MACHINE-LEARNING DETECTION	AI algorithms help identify emerging malware like viruses, worms, trojans, ransomware, spyware, advanced persistent threats and zero-day threats.
AUTOMATIC UPDATES	Threat definitions are updated automatically, keeping protection current without requiring user intervention.
AUDIT-READY LOGGING	All activities are written to the MFP audit log and displayed in the control panel's system information section.

Key Business Benefits

- **Helps stop attacks at the device** – Scans all data and files processed by the device, protecting organizations from malicious activity before it impacts their business.
- **Endpoint-grade protection** – The Bitdefender engine built into the Virus Detection Kit provides similar protection to what would be deployed on a Windows® or MacOS® endpoint, but optimized to run on the MFP's print controller.
- **Zero-touch for IT** – Activate once and the Virus Detection Kit automatically updates definitions and protects the device.
- **Future-proof investment** – One-time purchase with no subscription requirement for the life of the machine or the term of the lease, where installed.

Strengthen your print environment with proven anti-malware protection. Contact your Sharp representative or visit business.sharppusa.com/Document-Systems/Security to learn more.

*Not available on BP-C131WD, BP-C131PW, BP-1200C, BP-1200S, BP-1250M, and BP-1360M models.
