Improve efficiencies.

The Sharp and GoToConnect partnership makes it easy to apply the latest tools to improve efficiencies in your organization and reduce costs. We help you better understand communication and collaboration needs, analyze net costs, and improve employee productivity and customer support. With call reporting, click-to-call, intelligent call routing and optional call center queueing abilities, we can help you choose the features that are right for you.

Keep your distributed workforce connected, wherever they are.

What is your return to work strategy? A flexible, all-inclusive communication solution can empower your hybrid workforce to have web, audio and video conferencing tools as well as calls routed to wherever employees are working from.

- Launch impromptu meetings and share screens in personal meeting spaces
- Call, meet and message your way with improved call connections and video quality
- Control and update your cloud-based phone system and set up custom call routing in real-time
- Never miss a call—answer anytime, anywhere through the integrated IP-based deskphones, smartphone applications or web/desktop soft client and get immediate voicemail and email notifications
- Optional integrations like Office 365, Salesforce and call center level workflows to increase productivity

Experience +40% in Savings[1]
under one provider for calls, meetings and chat
