Simply Smarter Workplace

Elevate your workdays with smarter technology that is simple to use.

The Shift to Smarter

Smart technologies have simplified our lives at home. We speak to digital assistants and control our environments from our mobile devices. But, in general, that's not yet the office experience. Technology in the workplace should be as responsive, and we can help you get there.

Smarter Security
Help secure company data in and out of the office
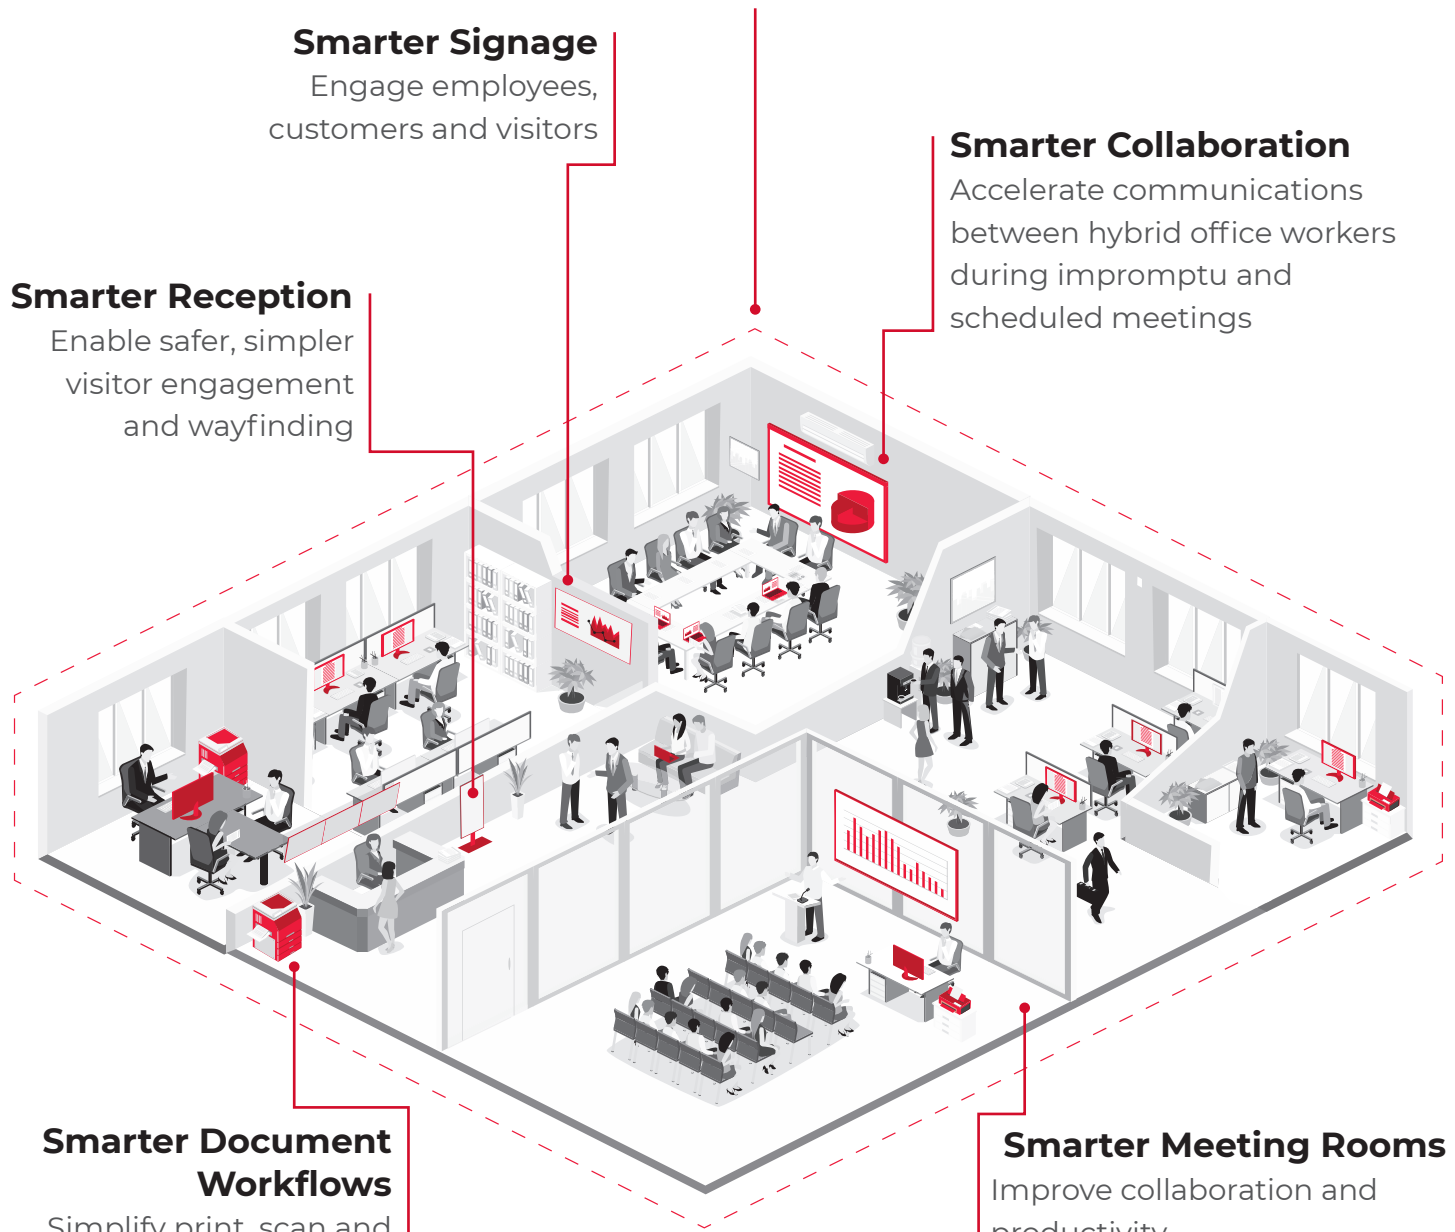

Smarter Signage
Engage employees, customers and visitors

Smarter Collaboration
Accelerate communications between hybrid office workers during impromptu and scheduled meetings

Smarter Reception
Enable safer, simpler visitor engagement and wayfinding

Smarter Document Workflows
Simplify print, scan and copy with mobile app and voice-controlled MFPs

Smarter Meeting Rooms
Improve collaboration and productivity

Simplify the Work Experience

It starts with a plan.

Create a smart office your way by teaming up with us. We begin with an assessment to identify opportunities to promote collaboration, efficiency and security. Then, we'll work together to build your ideal version of a smart workplace.

Collaboration

Uncover opportunities to improve the way employees communicate, conduct meetings and share information—in or away from the office.

Digitization

Improve document visibility across teams and simplify document workflows with advanced multifunction printers (MFP) and software.

Efficiency

Simplify the management of your copiers and printers to curb expenses; drive more efficient collaboration.

Security

Get proactive IT support and pinpoint network vulnerabilities to help prevent unauthorized access and data loss.

Collaboration

Enhance the way you communicate using state-of-the-art technology.

Collaboration Displays

Conduct intuitive meetings on the **AQUOS BOARD® interactive display**. Share screens, send files to and from mobile devices and collaborate on the responsive touchscreen with up to four people writing at once. The single USB-C connector makes it so simple to walk into a room, plug in your device and start working together straightaway. These interactive displays also feature an integrated controller with whiteboard, overlay and wireless functionality to help enhance your productivity.

Professional Displays

Communicate ever-changing information on full-HD Sharp displays, built for 24/7 commercial use and available in a wide range of sizes. What's more, video walls can make a big impact in spacious areas.

Synappx Collaboration Hub Experience

The Synappx collaboration hub experience encourages dynamic collaboration from start to finish for today's hybrid meetings, all from the comfort of your phone. Instantly engage with audiences and establish connections; easily share, control and present; and end meetings with one tap.

Copiers and Printers

Increase workflow efficiency whether at home or in the office with Sharp high-performance copiers and printers. Models offer exceptional image quality, integrated security and are easy to use and maintain.

Laptops

Dynabook laptops have their own proprietary BIOS and undergo rigorous pre-production testing, including military grade tests (MIL-STD810G). They can be built to order to meet your specific requirements so you always work productively, from anywhere.

Unified Communications

Help your team connect over a unified communications platform for voice, chat, text/SMS, email, fax and video conferencing.

Digitization

Easily access documents and data on-demand anytime, anywhere.

Advanced Document Scanning

Sharp multifunction printers (MFP) are equipped with advanced scanning functionality right out of the box. Integrations with industry leading content management and file storage apps streamline the digitization process. Not only can end users scan, but they can also route and store documents directly into the proper repository.

Advanced Capture Apps

Sharp's Open Systems Architecture (OSA) provides direct access to Advanced Capture apps from the MFP control panel. This gives users a single on-ramp to powerful automation tools for document processing, routing, OCR (optical character recognition), and data capture.

Workflow Automation

Digitize and automate existing manual processes to make timely and accurate business decisions anytime, anywhere. Workflow automation solutions streamline your processes making documents and data readily available regardless of a user's changing work arrangements.

Document Management

Store and manage your digital documents in a cloud-based, centralized system for secure on-demand access. Replace hard copy files and disorganized network shares with intuitive search and organization tools. Plus, help maintain compliance with granular access controls, full audit logs and records retention/management.

Bring the Office Home

Work from anywhere with technology from Sharp. Remain productive and protected with laptops and accessories, monitors, desktop printers and optional security and remote monitoring.

Efficiency

Stay agile by simplifying your print environment and document processes.

Simplified Device Management

Keep your print devices running at the level you'd expect with Machine Intelligence Call Assistance System (MICAS). MICAS, a free Sharp-engineered service application automates meter collection, service alerts and toner replenishment to increase uptime.

Control Print Usage

Shrink your printer count/footprint and costs by implementing eco-friendly printing policies to consume less paper and save on toner. Advanced print management software, such as PaperCut™, can facilitate billing, accounting, secure print release and activity tracking.

Managed Print Services

A dedicated team to manage and analyze your print environment to keep costs low, increase equipment uptime and improve efficiency. Understand your true cost of printing and receive a predictable invoice from a single vendor.

Synappx™ Applications

Synappx applications work with your current office technology to bring smart home convenience into the workplace. Remove frustrating technology hassles from meetings. Share or print information right where it's needed. Get smarter about your meeting spaces, all to drive more efficient collaboration.

Increase Efficiency and Support with Managed Print Services (MPS)

MPS can reduce print spending
up to 30%[1]

Pepperdine University
6 Campuses
with controlled print spending

Community Health Network
Saved $1M
over a five-year span

80% of small and medium sized businesses partnering with a Managed Service Provider have reduced cybersecurity risk.[2]

Security

Stay ahead of malicious intruders with leading edge security.

Printer and Copier Data Security

Help protect your organization's data with security features including firmware attack prevention and recovery, confidential printing, user authentication and an end-of-lease data erase feature.

Integrated Network Interface

Unauthorized access to an MFP or printer can put data at risk. Sharp MFPs' intelligent network interface provides security control features designed to prevent threats and document improper device access.

Multi-Layered Security Approach

Safeguard your laptops and PCs, servers and network with layered security. This approach provides protection across all stages of an attack, helping to prevent unauthorized access that can lead to ransomware and phishing threats.

Desktop and Network Security

From dark web protection to password management, experts can help prevent, identify or remediate threats like policy violations, fraudulent activity and security gaps.

Security-First Copiers and Printers

Stay ahead of malicious intruders with leading-edge security features.

- Firmware attack prevention and recovery

- Whitelisting capability

- Confidential printing

- Active Directory trusted device status

- End-of-lease feature to erase data upon return
