

**Sharp Imagers are now HP Output Server Certified**

Dear Sharp Document Imaging Dealer,

SDSCA is pleased to announce that Sharp's Digital IMAGERS™ are now **certified as ready** for HP Output Server. This new integration enables IT managers to manage print jobs using networked Sharp IMAGERS™ with HP Output Server.

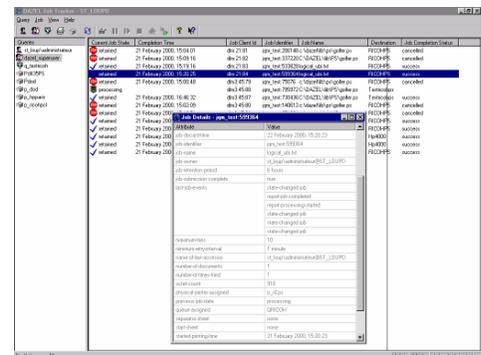

With seamless integration, IT managers and network administrators can easily track print jobs sent to Sharp printers and multifunction devices on the network.

HP Output Server provides IT managers with the ability to control and manage print jobs, destinations and queues as well as easily create user and group privileges and preferences. With the ability to monitor print jobs to Sharp Digital IMAGERS™ from the same consoles as other key IT resources, administrator can be alerted to potential problems and respond before productivity is impacted, minimizing costly downtime.

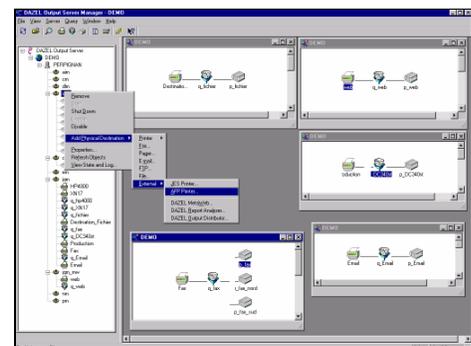

**Benefits:**

- ❖ **Provides** centralized control and management in addition to event monitoring
- ❖ **Supports** Job tracking and management
- ❖ **Enables** administrators to:
  - Create users and groups
  - Restrict privileges and set preferences
  - Create and manage destinations and queues
  - Manage jobs (start, stop, pause, move and re-submit)

**Features:**

- ❖ **View** status of all printer devices on the network
- ❖ **View** or **edit** specific Sharp MFP pages in HP Output Server
  - Status page
  - Configuration page
- ❖ **View** Sharp MFP jobs and queues
- ❖ **Tracks** the output job through final delivery and reports job status events
- ❖ **Enables** redelivery and fail over to alternate devices
