

## Backup and Disaster Recovery (BDR)

Built for Resilience.

Modern IT environments require a structured approach to protect, monitor and recover critical systems. Sharp's BDR solutions align with the NIST Cybersecurity Framework (CSF), supporting both the Protect and Recover functions to help organizations maintain resilience, minimize downtime and restore operations with confidence.

### A Practical Approach to NIST CSF

We map our services to how IT teams already think about risk, protection and recovery:

#### Protect

- Automated backups of servers, endpoints and critical data
- Cloud replication for offsite protection and redundancy
- Policy-based backup management to ensure consistency and coverage

#### Recover

- Rapid restoration of files, systems or full environments
- Virtualization for speedy recovery when needed
- Tested recovery processes aligned to Recovery Time Objectives (RTOs) and Recovery Point Objectives (RPOs)

### Our Core BDR Capabilities

#### Device and Cloud Backup

Backup coverage across physical and virtual environments, with secure offsite storage.

#### Business Continuity Planning and Execution

Recovery plans designed around your infrastructure and operational priorities.

#### Rapid Recovery and Virtualization

Minimize downtime with the ability to spin up systems quickly and restore operations without waiting on full rebuilds.

#### Network Operations Center (NOC)

Our NOC supports system health through 24/7 monitoring, routine updates and performance tuning, backup verification with alerting and proactive issue detection and remediation.

### What This Means for IT Teams

- Predictable, tested recovery processes
- Reduced downtime and operational disruption
- Clear visibility into system health
- Alignment with NIST CSF without added complexity
- Less manual oversight

**Evaluate your current backup and disaster recovery approach and align it with industry standards like NIST CSF. Contact Sharp to get started.**

# Explore Simply Smarter Technology

The latest interactive displays, laptops, document systems and audio visual technology can help your business collaborate and spend smarter.

## Collaboration Displays

Take teamwork to the next level with the collaboration displays, including the award-winning AQUOS BOARD interactive display.

## Laptops and Accessories

Wherever your desk may be, conquer your day with innovative and secure laptops, monitors and accessories.

## Unified Communications

Get the tools your team needs through a unified platform for voice, chat and video as well as Microsoft 365 collaboration applications.

## Managed Print Services

Identify opportunities to reduce expenses and increase efficiencies in your print environment.

## Commercial Displays and Projectors

From high-impact displays for digital signage, to state-of-the-art projectors with minimal maintenance, Sharp helps you communicate brilliantly.

## Copiers and Printers

Models offer hands-free interaction, exceptional image quality, integrated security and are easy to use and maintain.

## Digital Files and Workflows

Digitize paperwork and processes and manage files in one location for secure access, in or out of the office.

## IT Services and Support

Reliable and secure support for network monitoring, threat mitigation, compliance data reporting, data backup and more.

Learn how we can help support your technology needs today at [business.sharppusa.com](https://business.sharppusa.com)
