

## MX-PE16 FIERY® PRINT SERVER

### Fast processing speed, outstanding image quality, and time-saving workflows for the Sharp Pro Series MX-M1056/MX-M1206 Monochrome Document Systems

#### A powerful integrated solution for managing high-volume CRDs and in-plants.

- Manage jobs and access the full functionality of Fiere® Command WorkStation® integrated on the 15.4" Sharp touch-screen display
- Reduce setup time and cut waste with Fiere JobExpert™ that analyzes PDF files and automatically chooses optimal print settings
- Process large, complex VDP jobs fast to maximize throughput and utilize maximum engine capacity

#### Shorten Turnaround Times

The MX-PE16 offers the highest **performance-boosting power** in its class, so you can get more work done, faster. Increase efficiency with the automation benefits from the included, browser-based Fiere JobFlow™ Base. Reduce trial and error by automatically applying the right print settings for every job with Fiere JobExpert.

#### Unify Your Digital Print Room

The MX-PE16 utilizes Fiere Command WorkStation as a **centralized interface** for print job management. Enable operators to monitor, prepare and troubleshoot jobs from multiple Fiere Driven printers and manage them remotely or locally from the Sharp Pro Series touch-screen display.

*Sharp Pro Series MX-M1206 shown in full configuration.*

#### Expand your Print Offering

The MX-PE16 Fiere Server offers optional make-ready tools to **streamline job submission**. Efficiently perform a wide variety of production tasks and supports imposition of booklets with Fiere VUE and Booklet Maker. Add the optional Fiere JobMaster to insert scanned pages, tabs and perform advanced page editing functions.

#### Differentiate with Variable Data Printing

The MX-PE16 Fiere Server enables customers to save money by **personalizing printing** with built-in, entry-level Fiere FreeForm™. The MX-PE16 also supports industry-leading variable data printing (VDP) formats including PPML and the new PDF/VT formats.

#### Integrate For Greater Efficiency

The MX-PE16 Fiere Server uses the Adobe PDF Print Engine (APPE) rendering technology to offer a native end-to-end PDF workflow. Integrate your print production workflow with EFI management information systems, Web-to-Print systems, and popular prepress workflows for end-to-end automation.
