2. Programming

2-10. Checking the Machine Settings

To obtain a printout that show's the current settings, turn the mode switch to the ZPGM position and press [ESC].

General & Tax Setting

To see the general and tax settings, turn the mode switch to the ZPGM position and press [ESC].

a. By pressing the Mode key (same as the Drawer lock key), the display shows the current settings. If the setting is incorrect, turn off the cash register and correct the setting.

b. If the power is turned off, the cash register will show the factory default settings. To return to the factory default settings, turn on the cash register while pressing the AC adapter jack, and then press and hold the Mode key (same as the Drawer lock key) for 3 seconds or longer.

c. If the timer is not functioning properly, the cash register will show the factory default settings. To return to the factory default settings, turn on the cash register while pressing the AC adapter jack, and then press and hold the Mode key (same as the Drawer lock key) for 3 seconds or longer.

d. If the display does not illuminate even when the power is turned on, please read below before calling for service.

[Picture] The display does not illuminate even when the power is turned on.

No receipt is issued.

• Is the mode switch properly set to the REG position?
• Is the AC adapter connector out or loosely connected to the AC adapter jack? (Plug in the AC adapter correctly and securely connected to the AC adapter jack.)

• Is the mode switch properly set to the REG position?

No receipt is issued.

• Is the mode switch properly set to the REG position?
• Is the AC adapter connector out or loosely connected to the AC adapter jack? (Plug in the AC adapter correctly and securely connected to the AC adapter jack.)

You can use the date and time function to display the current date and time.

**2-5. Miscellaneous Settings**

Miscellaneous settings include the setting for each department, the setting for each PLU, and the setting for each tax rate.

**2-6. Printing Format**

When you press the VD mode symbol (VD) after entering the department, the amount entered cannot be entered.

**2-7. Setting the Date and Time**

Enter the date using a 4-digit number corresponding to the date of the message. The format is MM/DD/YY.

**2-8. Secret Code**

A secret code can be specified for each individual item. This secret code must be entered in order to print a receipt.

**2.4. Tax Rate Programming**

**Example: Tax 9.99%**

- **Tax rate number**
  - 0: for Department 1
  - 1: for Department 2
  - 2: for Department 3
  - 3: for Department 4
  - 4: for Department 5
  - 5: for Department 6
  - 6: for Department 7
  - 7: for Department 8
  - 8: for Department 9
  - 9: for Department 10

**Set the tax rate number for each department.**

**Example:**

- Department 1: 0.11 (11%)
- Department 2: 0.08 (8%)
- Department 3: 0.05 (5%)
- Department 4: 0.03 (3%)
- Department 5: 0.00 (0%)
- Department 6: 0.00 (0%)
- Department 7: 0.00 (0%)
- Department 8: 0.00 (0%)
- Department 9: 0.00 (0%)
- Department 10: 0.00 (0%)

**2.5. Miscellaneous Settings**

Miscellaneous settings include the setting for each department, the setting for each PLU, and the setting for each tax rate.

**2-7. Consecutive Receipt Number**

You can use the consecutive receipt number function to create a receipt number that is automatically incremented.

**2-8. Secret Code**

A secret code can be specified for each individual item. This secret code must be entered in order to print a receipt.

**2.4. Tax Rate Programming**

**Example: Tax 9.99%**

- **Tax rate number**
  - 0: for Department 1
  - 1: for Department 2
  - 2: for Department 3
  - 3: for Department 4
  - 4: for Department 5
  - 5: for Department 6
  - 6: for Department 7
  - 7: for Department 8
  - 8: for Department 9
  - 9: for Department 10

**Set the tax rate number for each department.**

**Example:**

- Department 1: 0.11 (11%)
- Department 2: 0.08 (8%)
- Department 3: 0.05 (5%)
- Department 4: 0.03 (3%)
- Department 5: 0.00 (0%)
- Department 6: 0.00 (0%)
- Department 7: 0.00 (0%)
- Department 8: 0.00 (0%)
- Department 9: 0.00 (0%)
- Department 10: 0.00 (0%)

**2.5. Miscellaneous Settings**

Miscellaneous settings include the setting for each department, the setting for each PLU, and the setting for each tax rate.

**2-7. Consecutive Receipt Number**

You can use the consecutive receipt number function to create a receipt number that is automatically incremented.

**2-8. Secret Code**

A secret code can be specified for each individual item. This secret code must be entered in order to print a receipt.

**2.4. Tax Rate Programming**

**Example: Tax 9.99%**

- **Tax rate number**
  - 0: for Department 1
  - 1: for Department 2
  - 2: for Department 3
  - 3: for Department 4
  - 4: for Department 5
  - 5: for Department 6
  - 6: for Department 7
  - 7: for Department 8
  - 8: for Department 9
  - 9: for Department 10

**Set the tax rate number for each department.**

**Example:**

- Department 1: 0.11 (11%)
- Department 2: 0.08 (8%)
- Department 3: 0.05 (5%)
- Department 4: 0.03 (3%)
- Department 5: 0.00 (0%)
- Department 6: 0.00 (0%)
- Department 7: 0.00 (0%)
- Department 8: 0.00 (0%)
- Department 9: 0.00 (0%)
- Department 10: 0.00 (0%)
