

### Enhance collaboration, manage costs and help meet regulatory compliance.

Sharp multifunction document systems can help state and local government facilities streamline document processing, protect sensitive information and control expenses.

#### Improve Efficiency with a Document Management System

Sharp, in coordination with our authorized resellers, offers easy-to-use enterprise document management systems, such as **GlobalSearch** by **Square 9 Softworks**®. Easily scan documents with intelligent routing with popular applications such as **Kofax AutoStore**® and **Drive I Image**™ by **LRS**.

#### Convert Documents to the File Format You Need

Easily **scan and convert** documents to popular file formats, such as Microsoft Word, PowerPoint® and Excel®, as well as Searchable PDF and Encrypted PDF, which elevates convenience and security. Built-in technology can convert them in a single step.

#### Print Case Files and Other Information From Mobile Devices

The Color Advanced Series makes it easy to securely print files from tablets and smart phones using **Sharpdesk® Mobile**, a downloadable app available for most smartphones and tablets.

#### Collaborate and Share Files with Popular Cloud Services

**Standard Cloud Connect** features on most Sharp multifunction printers (MFPs) make it easy to share information between government agencies, employees and clients using popular services such as Microsoft® Teams, OneDrive™ for Business, Google Drive™, Box, Dropbox and others.

#### Innovative Security Features Help Protect Files

Multi-layered **security features** built into Sharp MFPs, such as system integrity check, real-time intrusion detection and available antivirus powered by Bitdefender help protect confidential information and can also help meet and maintain regulatory compliance.

#### Case Study

City of Anderson, South Carolina

#### Business Challenges

The city's previous MFPs were unable to scan and print without breaking down repeatedly. The public works department had several filing cabinets full of engineering plans and drawings that needed to be organized and protected against security risks.

#### Technology Solutions

Sharp deployed workflow-centric MFPs and printers throughout the municipality to help streamline scanning and printing. Additionally, a document management system was installed to help manage their complex workflow. To further protect their documents, Sharp implemented Backup and Disaster Recovery Services. The total solution included:

- 23 Sharp MFPs
- 15 laser printers
- Disaster Recovery system
- DocuPhase document management system

#### Proven Results

Sharp provided the city of Anderson with a fleet of easy-to-use MFPs and printers that are fast and reliable. "Without Sharp's services, we would have had to spend weeks rescanning the data in order to get it back into the system," says Adam Cromer, Stormwater Manager, City of Anderson Public Works Division.

**Easy-to-Use** – Sharp MFPs are designed with an intuitive operation panel that delivers a responsive, accurate user experience. The flat touchscreen provides good visibility in bright light and is easy to wipe clean of allergens.

**Full Function Capability** – All models offer strong multifunction features, including copying, printing, and network scanning. Access to popular cloud services such as Microsoft® Teams, Google Drive™, Dropbox and others are available on most models.

**Network Friendly** – Integrates seamlessly with today's modern education environments and supports the latest communication and security protocols. Most models also offer optional Bitdefender antivirus protection.

Sharp's user-friendly touchscreen display is customizable for convenience and common among 30+ other models.

## Designed to deliver performance and productivity.

- Built-in **retractable keyboard** on most models simplifies email address and subject line entries.
- **Enhanced touchscreen** delivers an accurate, responsive user experience and provides easy access to features.
- **Easy user collaboration** with walk-up access to popular cloud applications on most models such as Microsoft® Teams, Google Drive™, Dropbox and others.
- **Automatic Firmware Updates** help ensure MFP settings and features are always up to date.
- Supports popular mobile technologies, including **Apple® Airprint®** and **Android™ Print Framework**.
- **Compact PDF** scanning feature reduces the file size of scanned color documents, resulting in decreased network traffic and more efficient use of disk and cloud storage.
- With the **Sharpdesk® Mobile** app, users can securely connect to Sharp MFPs via wireless networking from smart phones and tablets, providing a consistent mobile **printing and scanning** experience across the organization.
- Standard **duplexing document feeder** on most models can scan both sides of a document in a single pass, saving time and putting less wear on the machine.
- **Strong multi-layered security** such as system integrity check, intrusion detection and optional Bitdefender antivirus help protect your data.
- **Serverless Print Release** feature available on most models enables users to securely print a job and release it from up to ten Sharp MFPs anywhere in the office environment.
- Supports **Microsoft Universal Print**, enabling users to adapt to this popular cloud service.
- **Sharp Remote Device Manager** simplifies device monitoring and management with event-driven alerts to help maximize uptime.
